Administrative organisation of the EPR

Public authorities

Spécification document :
Objectives of the EPR

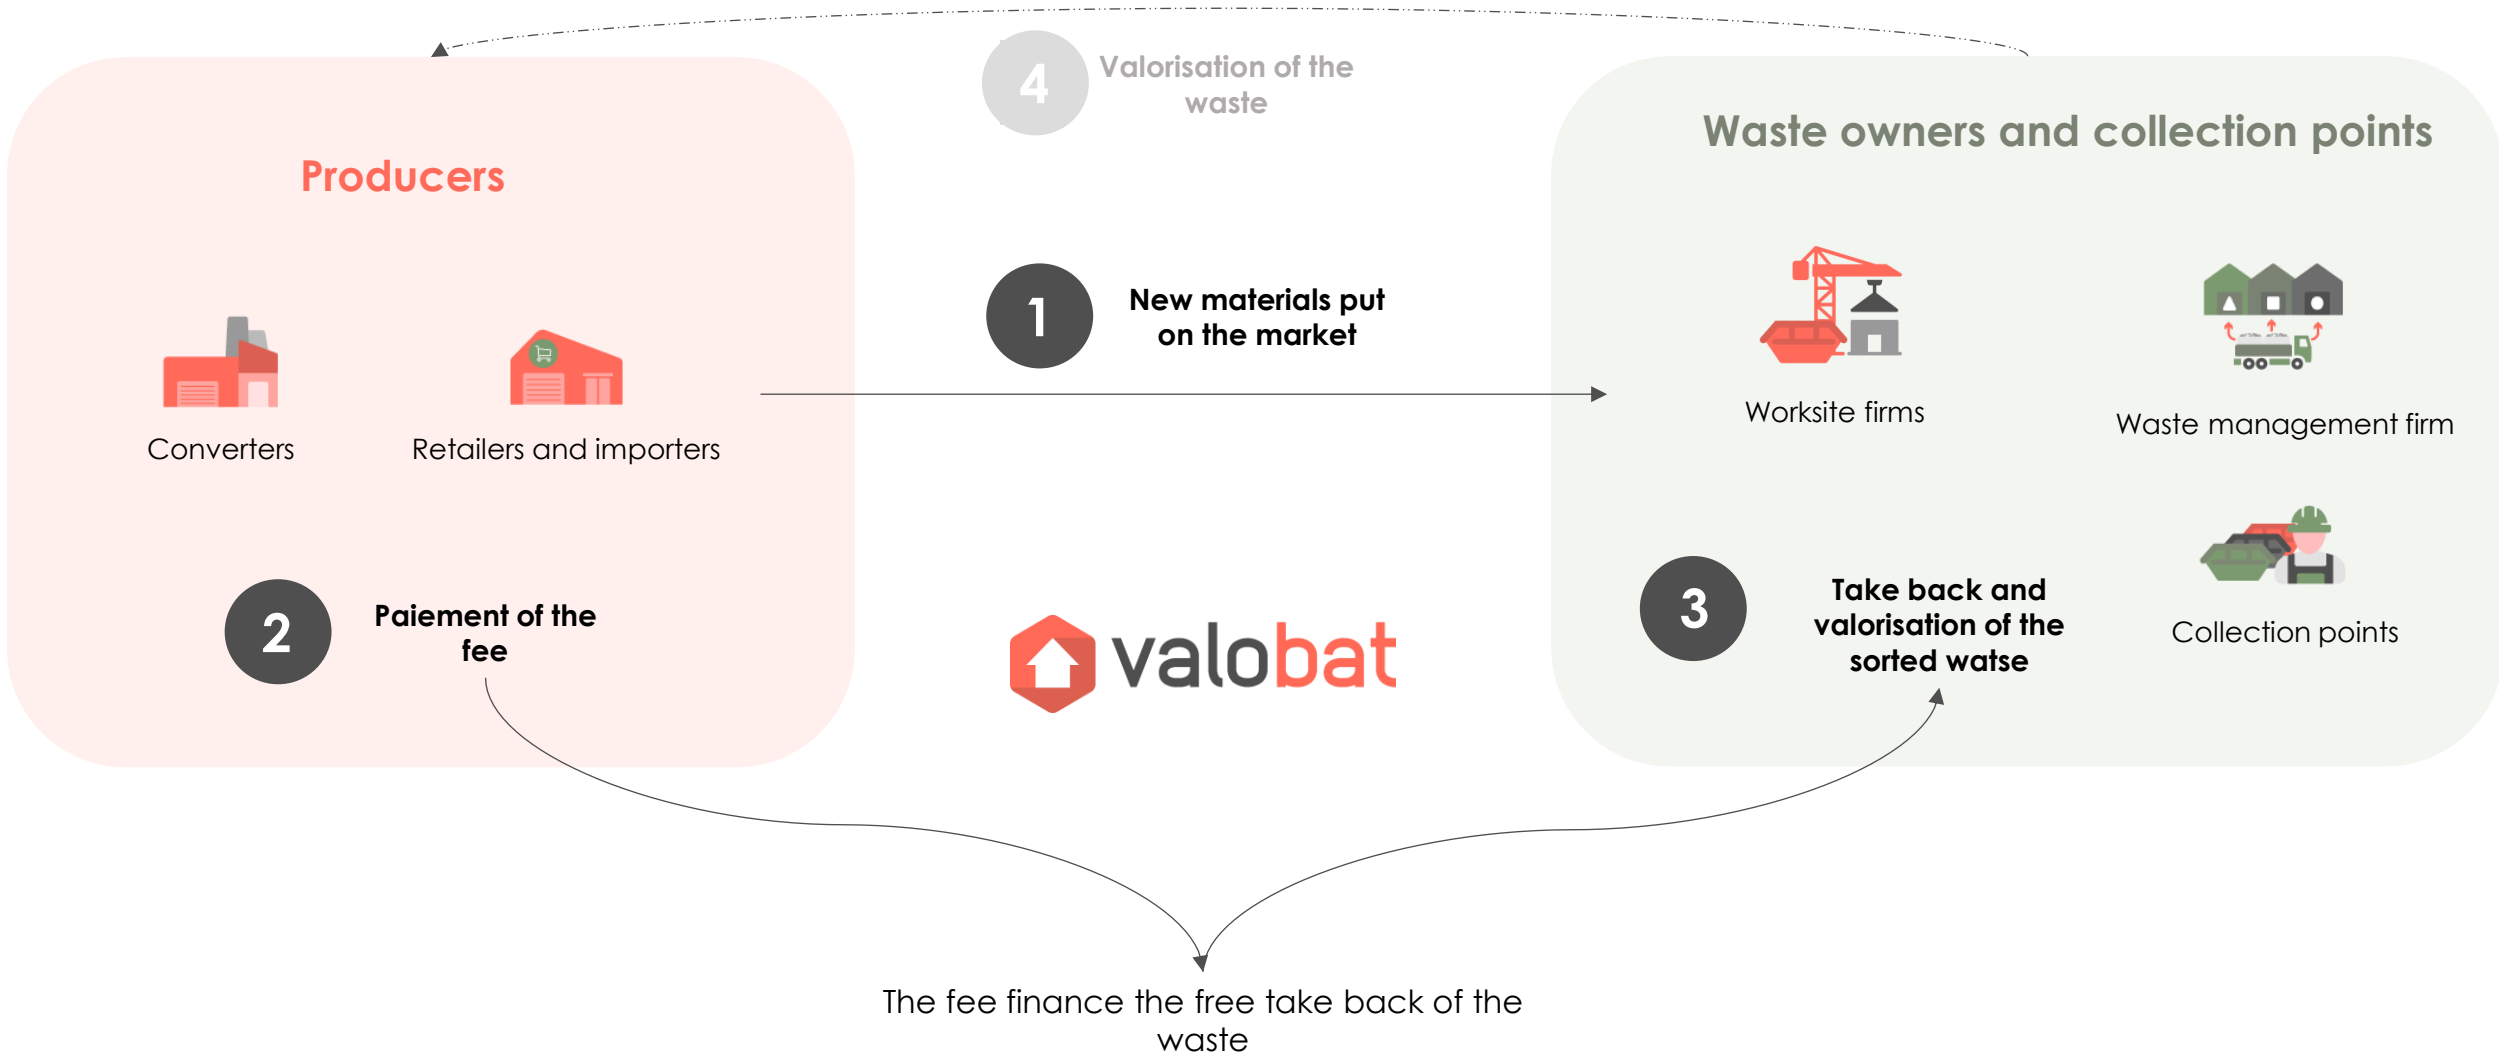

- Collection and recycling objectives per type of waste
- % of the turnover dedicated to R&D and communication
- ...

Implementation

PROs of the French Building EPR

- Call for tender
- Call for projects
- ...

BUILDING EPR: how does it work ?

Sorted waste **collected for free**

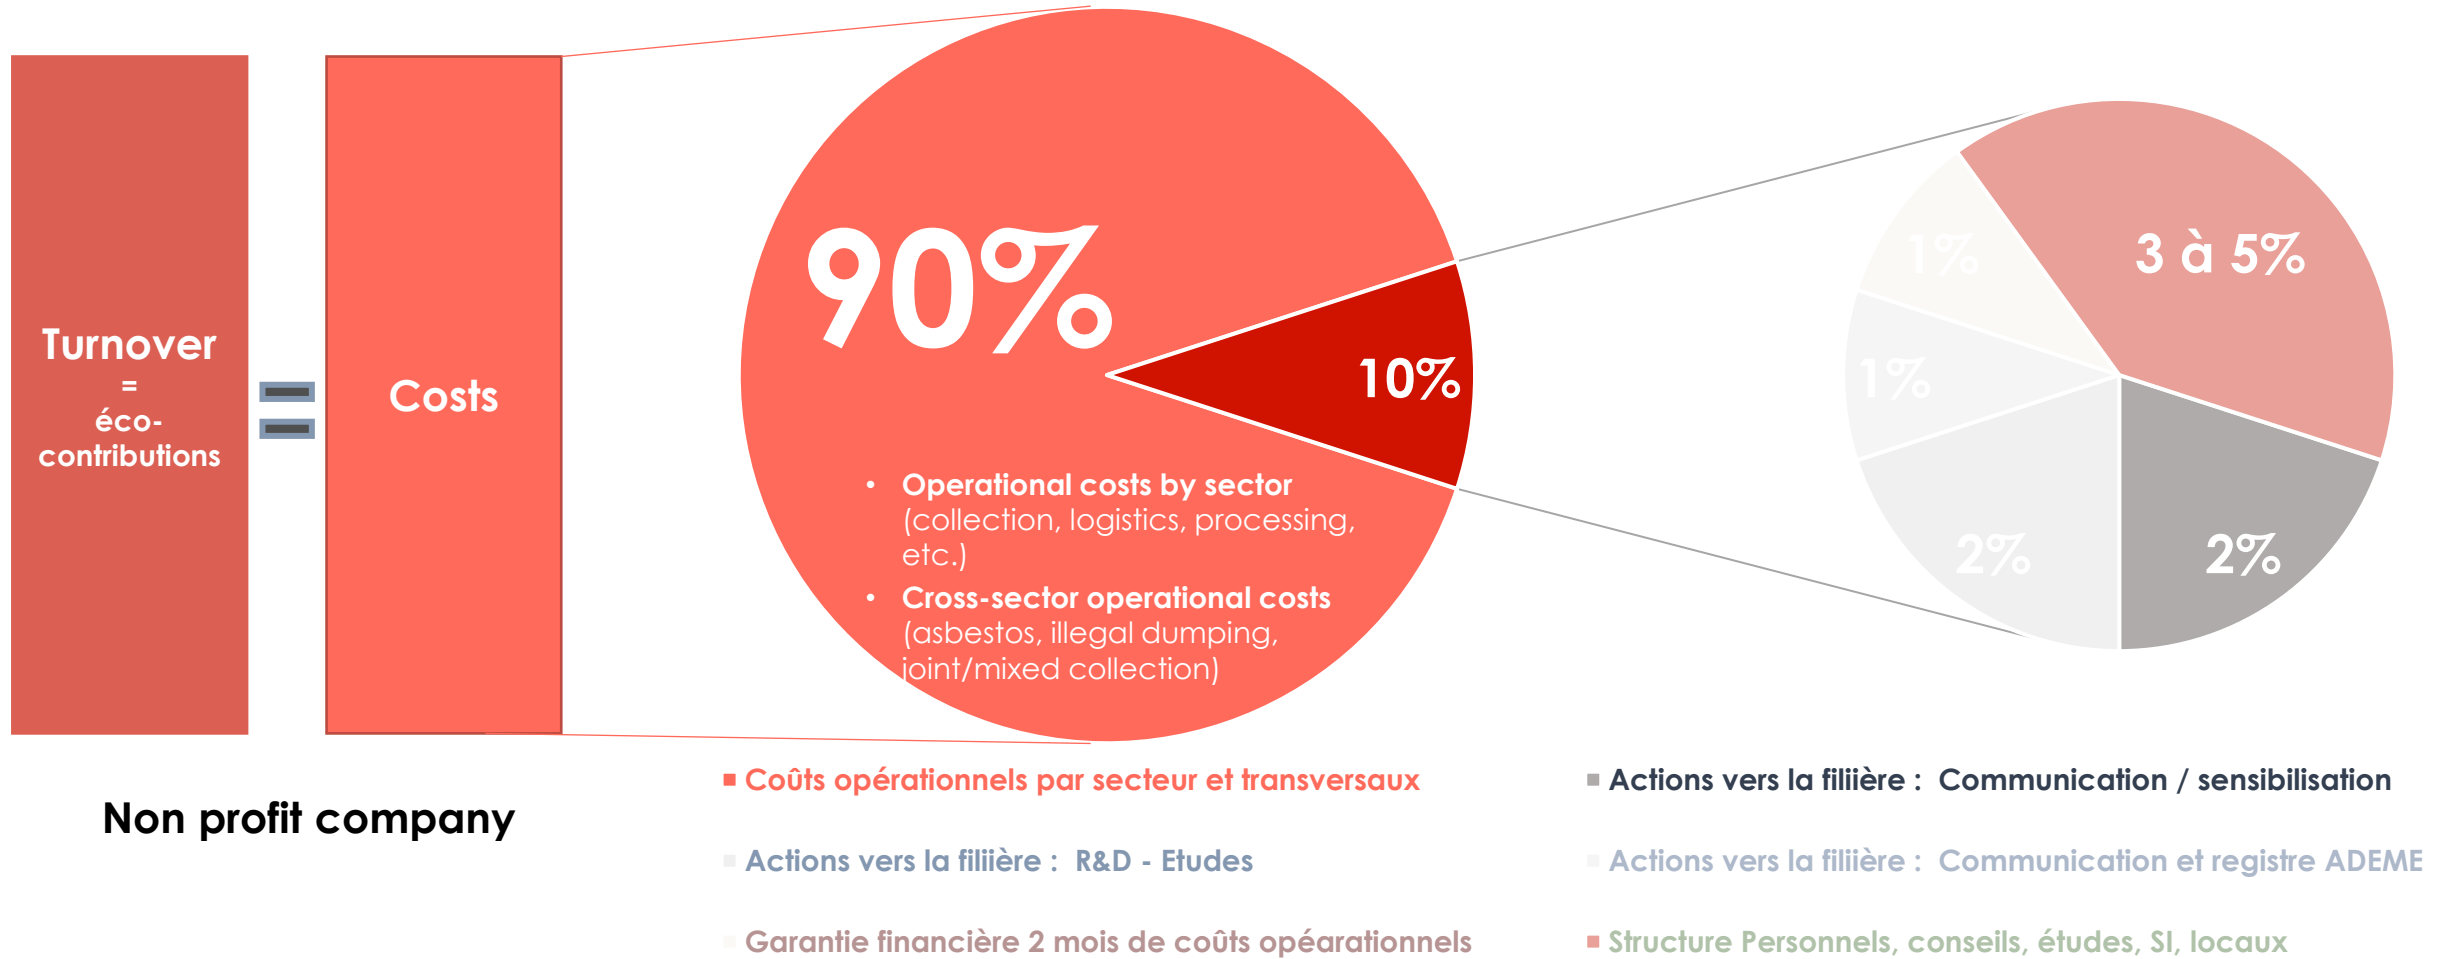

6 **mandatory** waste stream

- ✓ Inerts
- ✓ Metal
- ✓ Wood
- ✓ Plaster
- ✓ Plastics (including PVC flooring)
- ✓ Windows and doors (wood, metal, plastics)

Optional waste stream managed by Valobat

- Carpet
- Mineral wool
- Bitumen membranes
- Mixed waste for Solid Recovered Fuel

Valobat Business model

VALOBAT

51 shareholders that represent the building sector

Co-construction within 11 sector committees

Waste collection offers dedicated to **craftmen and job sites**

The job site generates a small amount of waste

4000 collection points

The job site generates a big amount of waste

Collection on more than 5000 job sites

The installer can massify waste on his
own site

Collection on more
than 500 installer's sites

Our services are cumulative and adaptable depending on the job site.

Complementarity with **our members collection schemes**

**VALOBAT supports
the converters
collection schemes**

Service de reprise pour les entreprises spécialistes

Découvrez ci-dessous les différents programmes de collecte et de recyclage de nos fabricants à destination des entreprises spécialistes (menuisiers, soliers,...)

Reprise de revêtements de sol

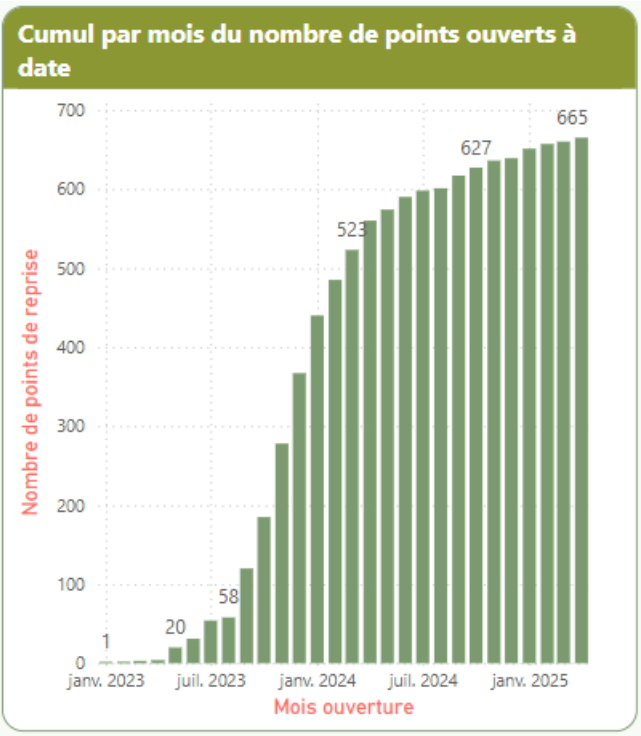

Reprise de menuiseries vitrées

Reprise de laines de roche ou Polystyrène expansé

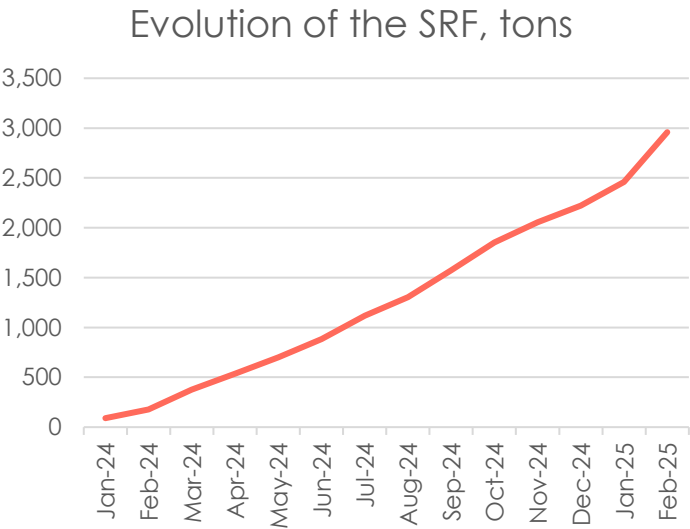

A growing collection for the **flooring streams**

Collection points amount

SRF, PVC flooring, Carpet, Textiles floors

Increasing of the plastics collection

Specific sectors documentation towards installers

Déchets de chantier des soliers

mon tri leur redonne vie !

LE GUIDE PRATIQUE
Pour tout comprendre sur la reprise sans frais des déchets triés des soliers

valobat

Valobat pillars **for circularity**

INNOVATION AND RECYCLING

- 23 R&D projects financed

Including 2 projects for carpet recycling

REUSE

- 6 100 ton reused
- 11 reused platforms supported
- 157 construction projects supported through 2 calls for project
- 32 producers voluntarily integrating reuse into their operations
- Launch of a reuse support scheme (€/t) for manufacturers

Partnership with 2 reuse actors

ECO-DESIGN

- Eco-design program for producers
 - Develop your project with an eco-design consultant
 - Available since April 2025 !
- Eco-modulations (bonus/malus)
 - Recycled content (pre and post consumer)
 - Reuse

Assessment of **the 2 past years**

FOR THE PRODUCERS

- **More than 6000** members (More than 50 % of the building products producers has chosen Valobat)
- A cost for producers but new services : Eco-design, R&D, reuse, producers contract=> increase the added value
- Communication to the customers

WASTE COLLECTION

- **4000 collection point, 5700 worksites supported, 500 installers** receive the service on their own sites
- **More than 1 000 Kt of waste** collected en 2024
- **150 expérimentations for reuse** of the products on the worksites
- **New waste streams** for the waste management companies for recycling instead of landfilling => added value created
